DOCUMENT

1. The first step in the process is to identify the problem or issue that needs to be addressed.

2. The next step is to gather information and data related to the problem.

3. Once the information is gathered, the next step is to analyze the data and identify the root cause of the problem.

4. After the root cause is identified, the next step is to develop a plan of action to address the problem.

5. The final step is to implement the plan and monitor the results to ensure the problem is resolved.

6. Once the problem is resolved, the next step is to evaluate the process and make any necessary adjustments.

7. The final step is to document the process and results for future reference.

8. The final step is to communicate the results of the process to the relevant stakeholders.

9. The final step is to ensure that the problem does not recur.

10. The final step is to ensure that the process is followed consistently in the future.

11. The final step is to ensure that the process is improved over time.

12. The final step is to ensure that the process is followed consistently in the future.

13. The final step is to ensure that the process is improved over time.

14. The final step is to ensure that the process is followed consistently in the future.

15. The final step is to ensure that the process is improved over time.

16. The final step is to ensure that the process is followed consistently in the future.

17. The final step is to ensure that the process is improved over time.
